INTRODUCTION

ABOUT THIS RESOURCE

Supporting PSHE education leads and teachers working with pupils with special educational needs and disability (SEND) in both special and mainstream settings is a key part of our work. We are therefore delighted to launch this fully updated version of the PSHE Association Planning Framework for Pupils with SEND.

All schools are required to teach the majority of PSHE education from September 2020. This includes Relationships Education at key stages 1 and 2, Relationships and Sex Education (RSE) at key stages 3 and 4, and Health Education in both primary and secondary phases¹.

This latest version of our Framework accompanies the 2020 edition of the [PSHE Association Programme of Study for PSHE education](#) and is fully aligned with the [Statutory Guidance for Relationships Education, Relationships and Sex Education \(RSE\) and Health Education](#) from the Department for Education (DfE). We have mapped the content grids from this statutory guidance to the Planning Framework, and adapted learning outcomes appropriately in cases where statutory content may not be accessible for pupils with SEND.

This Framework also supports schools to provide a comprehensive PSHE programme that integrates, but is not limited to, this new statutory content. 'The World I Live In' section covers aspects of PSHE relating to careers education, economic wellbeing, personal safety (including assessing and managing risk) and preparing for adulthood. Though not yet a statutory part of PSHE education, this learning is critical to support different levels of independence that pupils with SEND may have, as well as helping schools to meet the Gatsby Benchmarks for careers education as part of the [DfE Careers Strategy](#)². The Framework covers all of this while supporting you to plan, assess, monitor and evidence progress and achievement in your pupils' PSHE education.

1 The requirements for Relationships Education and RSE apply to all schools and academies. Health education is not statutory for independent schools where PSHE education is already compulsory. However, it is anticipated that independent schools will draw on the statutory Health Education guidance when planning their PSHE education provision.

2 The [SEND Gatsby benchmark toolkit](#) provides advice on how all schools can help young people with SEND move into the world of work.

HOW THE PSHE EDUCATION PLANNING FRAMEWORK FOR PUPILS WITH SEND IS ORGANISED

The Planning Framework is organised into six sections:

1. **Self-Awareness** (Me, who I am, my likes, dislikes, strengths and interests)
2. **Self-care, Support and Safety** (Looking after myself and keeping safe; aspects of Relationships and Sex Education.)
3. **Managing Feelings** (Understanding feelings, and that how I feel and how others feel affects choices and behaviour; aspects of Relationships and Sex Education)
4. **Changing and Growing** (How I and others are changing; new opportunities and responsibilities; aspects of Relationships and Sex Education)
5. **Healthy Lifestyles** (Being and keeping healthy, physically and mentally)
6. **The World I Live In** (Living confidently in the wider world)

Each of the six sections is subdivided into topic areas, as set out below. Please note that there is overlap between the topic areas and sections, for example, mental health and online safety are explicitly covered in some topic areas but are also integrated throughout all six sections where appropriate.

Section	Key stage 1 and 2 Topic areas	Key stage 3 and 4 Topic areas
Self-Awareness	<ol style="list-style-type: none">1. <i>Things we are good at</i>2. <i>Kind and unkind behaviours</i>3. <i>Playing and working together</i>4. <i>People who are special to us</i>5. <i>Getting on with others</i>	<ol style="list-style-type: none">1. <i>Personal strengths</i>2. <i>Skills for learning</i>3. <i>Prejudice and discrimination</i>4. <i>Managing pressure</i>

Grids for each section identify learning outcomes for each topic area in progressive stages, starting with the first stage, 'Encountering', through to the final stage, 'Enhancement'. Each column builds on the one before, assumes that the pupil has met the previous column's outcomes, and in some cases introduces new or additional learning in successive columns.

Encountering	Foundation	Core	Development	Enrichment	Enhancement
effective engagement in the learning process	underpinning learning	fundamental learning elements	increasing understanding of learning	deepening of application of learning	applying learning in different contexts

Opportunities are presented for pupils (where appropriate/possible) to:

- Experience taking and sharing responsibility.
- Feel positive about themselves and others.
- Reflect on their perceptions and experiences.
- Develop the understanding, language, communication skills and strategies required to exercise personal autonomy wherever possible.
- Carry out or take part in daily personal living routines.
- Make real decisions (with support where necessary so that they can act upon them).
- Take part in group activities and make contributions.
- Develop and maintain positive relationships and interactions with others.
- Recognise and celebrate their achievements and successes.

USING AND ADAPTING THE PLANNING FRAMEWORK FOR PUPILS WITH SEND TO SUPPORT YOUR PSHE EDUCATION PROVISION

The Planning Framework is intended only as a guide to the possible content of a spiral PSHE education programme for pupils with SEND. You are free to use it flexibly, adapting it to the unique needs and abilities of your pupils, as their development will not necessarily correspond to their chronological age or their key stage in many aspects of their learning in PSHE education. For example, you might need to draw on learning outcomes from key stages 1 & 2 for some pupils in key stage 3 or 4 and vice versa, or you might need to draw from both phases for some pupils. Much of the learning may need to be regularly re-visited and consolidated — the focus should be on the quality of learning rather than quantity of 'topics' covered.

It is not enough to simply teach pupils about the issues covered in the framework; it is vital they have the opportunity to explore, recognise and understand the subject content. This will help to ensure pupils develop the essential skills and attributes identified in the Framework, including key communication skills, vocabulary, strategies and the confidence to help manage issues when they encounter them (knowing how to seek help when necessary). Like all children and young people, pupils with SEND live in an increasingly 'connected' world. They are not always able to recognise or separate the 'offline world' from the 'online world'; therefore, all topics should be explored within the context of both.

If helpful, the learning outcomes for each topic area can be further broken down into smaller steps in the form of 'I can' statements. These can be used as a way to evidence pupils' progress.

Alternatively, a set of descriptors for 'working towards...', 'working at.../attaining' or 'working beyond/exceeding' using the learning outcomes in the grid could be used. Depending on the level of special educational need, pupils may be able to work only within the learning outcomes of one column, e.g. Encountering or Foundation. However, some pupils may be able to work progressively across the six stages with regular opportunities for revisiting and consolidation of previous outcomes. In this way, the framework could be adapted for groups of pupils or used to create a bespoke learning programme for individual pupils.

The Framework may also be used to help audit your school's current PSHE education provision by mapping your curriculum or schemes of work against the Framework content and then adding to or updating your schemes of work as necessary.

The Planning Framework may be further modified and adapted to pupils' needs by:

- Breaking down the learning outcomes into smaller steps so that they form the basis of a lesson or series of lessons.
- Re-visiting, re-enforcing, consolidating and generalising previous learning, as well as introducing new concepts, knowledge and skills.
- Focusing on one aspect or a limited number of aspects within each stage.
- Re-visiting content through cross-curricular learning and/or through other activities in school.
- Offering both explicit and implicit learning opportunities and experiences which reflect pupils' increasing independence (where applicable).
- Incorporating the six stages into school assessment procedures, so that pupils' progress can be monitored both within lessons as well as over a period of time.
- Using some of the baseline assessment ideas in Appendix 3, to identify pupils' starting points. The learning outcomes could then be used to give meaningful feedback as well as next steps for pupils.
- Including different sensory experiences at the 'encountering' level tailored to individual pupils, in addition to responding to adult prompting.
- Providing opportunities both in and out of school to promote physical, social and emotional understanding as pupils move from the primary phase through to the secondary phase.

In mainstream settings, the framework can be used to support pupils with SEND by:

- Using the strand in the planning framework that best matches the Programme of Study topic which is being taught to the rest of the class.
- Using the learning outcomes in the planning framework to support targets and identified areas of need in a pupil's Education, Health and Care plan (EHC).
- Using the learning outcomes in the planning framework to support a pupil's Individual Education Plan (IEP) targets.

APPENDIX 3

ASSESSMENT

Assessment in PSHE education is especially important to evidence the progress of pupils with SEND and in order to identify future learning needs. For some pupils this may entail very small steps which are consolidated and reinforced by re-visiting their original learning. Other pupils may be able to progress through the six stages and manage increasing levels of challenge. The most meaningful model of assessment in PSHE education, especially for pupils with SEND, is ipsative assessment — in which a pupil's own starting point is the benchmark against which progress is measured, rather than the performance of others or the requirements of an exam syllabus. This gives us the following model for assessing learning in PSHE education:

EXAMPLE BASELINE AND END POINT ASSESSMENT ACTIVITIES

Carrying out a baseline assessment activity at the beginning of each new topic will ensure that the subsequent learning starts where the pupils are, is matched to their individual needs and allows progress to be demonstrated or measured.

Examples of activities that lend themselves to baseline and end point assessment are outlined below. These are for guidance only, and should be adapted depending on pupils' specific learning needs and abilities. For more on assessment in PSHE education, see the PSHE Association's primary and secondary assessment guides.

Baseline activity	Useful for assessing	End point activity to demonstrate progress
<p>Role play</p> <p>Teacher/adult and pupil(s) take part in role play using: puppets, dolls, costumes.</p>	<p>Skills applied, strategies recalled and deployed.</p>	<p>Repeat role play showing how strategies or skills have been retained/recalled/developed/used. A role play/conversation on a related but more challenging situation could be used.</p>
<p>Responding to a picture, photograph, drawing, film clip, story board, cartoon strip or any other kind of sensory stimuli.</p>	<p>Knowledge, understanding, attitudes, beliefs, strategies.</p>	<p>Photographs could be taken of the pupil's initial physical response or notes made of their verbal response/communication at both the beginning and the end of the lesson.</p> <p>If written down, revisit in a different colour; discuss or write down any changes to their original response as a result of the learning.</p>
<p>Graffiti wall/working wall</p> <p>Pupils select from a pool of pictures, images, widgets, photographs and add to their wall. Pupils who are able to write can add their ideas to the wall.</p>	<p>Starting point of an individual pupil or group of pupils' knowledge, understanding, beliefs, questions related to the topic, identifying misconceptions.</p>	<p>Change/move/add more pictures to the arrangement of images originally created.</p> <p>If written work, revisit in a different colour—add, amend, expand, change, discuss or write down any changes in their responses as result of the learning.</p>
<p>Draw & write/draw & talk/point & talk</p> <p>Pupils respond in pictures (or pictures and words) to an open-ended, neutral instruction: e.g. draw a healthy person.</p>	<p>Knowledge, understanding, attitudes, beliefs, simple concepts, identifying misconceptions.</p>	<p>Re-visit in a different colour — add, amend, expand.</p> <p>If oral work, repeat same prompts, add in additional information/pictures, ask to justify choices of pictures.</p>
<p>Continuum/washing line</p>	<p>Attitudes, beliefs, attributes, identifying misconceptions.</p>	<p>Repeat the activity, asking pupils if they have moved along the continuum (this can be using point and talk, pencil and paper or by asking pupils to physically move along a standing continuum if appropriate) and to give their reasons for doing so; photograph new continuum or washing line positions and compare with photograph of baseline positions.</p>

Additional ideas for activities to demonstrate learning at the end of lesson or a series of lessons could include:

- pupil presentations to the rest of the class or group (prompted/supported by an adult or peer if necessary),
- producing images/pictures/photographs/blogs of pupils' work for display in the classroom or around the school, or in a large book (these could be shared in school newsletters or in an assembly)
- filming/audio recording of pupils' work when they have demonstrated a particular skill or attribute.

All the activities above provide assessment evidence in their own right and where a baseline activity has been revisited it is usually very easy to demonstrate the nature and extent of progress made. The different methods of gathering evidence of progress set out above can be incorporated into a more formal method of recording attainment if desired by assessing against success criteria.
